

Winter Driving Checklist

Essential Knowledge	Complete
Tyres	
Maintain at least 3mm tread depth for winter driving	
Consider winter tyres when temperatures drop below 7°C	
Check tyre pressure weekly – cold weather affects pressure	
Look for signs of wear or damage	
Fluids	
Top up antifreeze – use the correct concentration	
Keep screen wash topped up with winter-grade solution	
Check oil levels regularly	
Maintain brake fluid levels	
Battery Care	
Batteries work harder in cold weather - Get it tested before winter sets in	
Keep terminals clean and connections tight	
Consider a trickle charger for infrequently used vehicles	
Winter Emergency Kit - Keep these essentials in your car:	
Ice scraper and de-icer	
Torch and spare batteries	
Blanket and warm clothes	
Jump leads	
First aid kit	

Shovel	
High-visibility jacket	
Snacks and water
